

The classic Ducale with energy saving system

Description: The historic Ducale, fully painted steel, available in electronic version with **Energy technology** for energy saving. Serial also the system mixer that allows to reduce the performance drop of the machine in the presence of strong demands for hot water.

Colors ● Black texturised

Specifications:

Groups	2	3
Programmable Energy Technology	✓	✓
Hot water mixing system	✓	✓
2Manometer, 1Boiler e 1Pump brake-gauge	✓	✓
Pump filter	✓	✓
Stainless steel steam nozzle	2	2
Hot water dispenser	1	1
Sight glass	✓	✓
Autoleveller	✓	✓
Built-in volumetric pump	✓	✓
Boiler draining tap	✓	✓

Technical data:

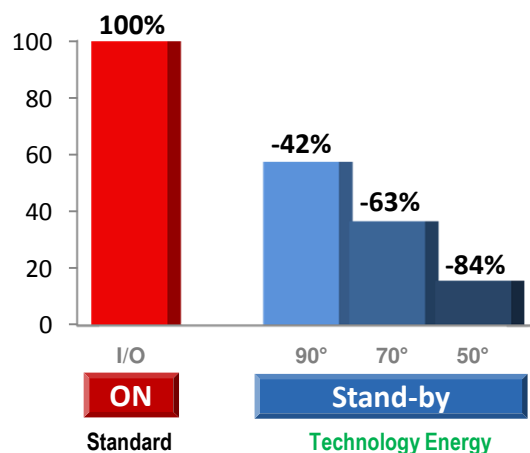

Groups	2	3
Dimensions (LxPxH) cm	77x57x45	101x57x45
Power (W)	3500	4000
Supply (V)	230-400	230-400
Boiler (L)	10,4	19,7

Optionals and Accessories

Cups warmer
Beats counter
Powersteam
Cappuccino maker
Softener manual
Softener automatic
Filter holder for coffee pods
Filter holder for coffee capsules
Filter holder for American coffee

Technology Energy

Electricity consumption reduced to 84%

The **Energy Technology** is a significant saving of electricity. The electronic control of the boiler temperature drastically lowers the electricity consumption during standby moments of the machine.

Our studies, based on simulating the conditions of normal use, demonstrate the possibility to obtain significant savings in energy consumption up to:

42%
÷
84%

derived from the electronic temperature control by activating the stand-by function that allows the maintenance of optimum temperature for the rapid recovery of the operating temperature
